BACKGROUND OF SEO:

The sole purpose of SEO services is to ensure website owners that when potential customers search for their related products and services of their website using specific keyword phrases, then their website will appear on the first 2 pages of the search results on any related keyword search to their business.

This is much harder than it sounds because there are billions of WebPage competing for only the first 20 listing and there are no schools for Internet Marketing, which is why companies are faced with the reality to have to hire a professional SEO provider to market their website.

Statistically, SEO is VITAL to ANY website as 85% of all websites are found from 20 search engines, like Yahoo, Google, AOL, MSN, etc., and 99% of users only visit the first 2 pages.

Our SEO is different than any SEO company in the world. We have the LOWEST prices on the INTERNET and we are the only company offering UNLIMITED Top-20 keyword rankings in the 100's to 1,000's, giving clients MAJOR competitive advance online.
